

DIGGING DEEP TO DELIVER CIVIL

FIRST CHOICE FOR_ CIVIL

Cassidy Construction is your go-to contractor for civil projects, with or without a vertical construction component.

We're a premium self-performing contractor with our own specialist civil division – which means our full suite of plant and workforce is backed by big-company systems and professionalism, and our civil clients can leverage and benefit from the expertise and experience of our construction arm.

We believe the success of a civil job depends on the quality of the work done before the digger starts its engine, so we add value by developing astute programmes and methodologies that get the job done better and more efficiently.

We are leaders in early contractor involvement (ECI), which helps us recommend cost and time efficiencies and de-risk your project.

And because our self-performing capability allows us to be agile and responsive, we're your ideal choice for short-notice projects and jobs in challenging environments or with complex logistical components.

We employ our own teams, from engineers to digger operators and certified drainlayers, so we can control every stage of our projects and deliver the quality results our growing roster of public and private clients have come to expect.

How Cassidy Construction adds value

- **A trusted, experienced contractor**
- **Expertise in complex civil work**
- **Self-performing civil, drainage, concrete, carpentry and painting**
- **Certainty of delivery**
- **Fully equipped plant and machinery**
- **Excellence in quality management**
- **Proactive, clear communication**
- **ECI de-risks your project**
- **More sustainable outcomes**
- **Next-practice HSE systems**
- **A dedicated, stable team**
- **Holistic service for the life of your asset**

- Trenching
- Foundations
- Piling
- Concrete and PVC ducting
- Slip remediation
- Retaining walls
- Drainage
- Culverts
- Concrete structures
- Carparks and roading
- Removal of contaminated waste

A proven track record

During more than two decades in the business, we have delivered numerous successful civil projects, both as part of construction contracts and as standalone civil commissions. Our work is underpinned by our Building Positive Change strategy, which guides our quest to be a sustainable and responsible contract partner and your First Choice for civil projects.

Nationwide delivery

Although our headquarters are in Auckland, we're committed to servicing the entire country. We have teams ready to base themselves in remote locations for the duration of your job, and we supplement our capability with a strong nationwide network of partner contractors and suppliers.

Scalable capacity

We've built a reputation as a bespoke operator delivering high-quality small-to-medium projects, but our flexible self-performing model means we're able to scale up to suit larger jobs by drawing on our family of trusted subcontractors and sourcing machinery specific to your job.

De-risking the environment

We are well versed in working around live assets and with standovers, and have exceptional health, safety and environment (HSE) practices. Our safety-first culture is founded on our ISO 45001 and 14001 accredited HSE management system and lived and breathed every day on our sites. We understand the importance of environmental safeguards in civil projects and put controls in place to prevent detrimental impacts.

Solution focussed

Our site teams are highly experienced in staging work around weather delays and identifying contamination and dangerous substances, and if unexpected issues do arise we'll come to you with a solution that will help keep your job on track.

A team you can trust

We believe that collaborative and open communication is critical to great results, and take pride in the fact that about 90 per cent of our work comes from repeat clients whose previous experience of working with the Cassidy team makes us their First Choice for future projects.

PUSHING BOUNDARIES

HOW WE DO IT DIFFERENTLY

At Cassidy Construction we believe in pushing boundaries to provide better service to our clients. We continually invest in upskilling and innovation to stay at the forefront of the construction sector.

ECI

Early contractor involvement done right

We work proactively and collaboratively with clients and contractors to streamline methodologies and de-risk projects early in the design and planning process.

BIM

Modelling the future with digital technology

Our building information modelling capability allows us to preview projects virtually, simulate potential impacts and deliver solutions before they become real-life problems.

HSE

Controlling risk through HECA

We are committed to a zero-harm workplace and continually seek ways to safeguard our sites, including implementing programmes such as high energy control assessment (HECA).

QA

Delivering the quality results our clients demand and deserve

We set exceptional standards for the quality of our work and continually monitor our delivery via our ISO 9001 aligned in-house quality management system.

BUILDING POSITIVE CHANGE

We aim to be your First Choice for civil projects, not only because you trust us to deliver a quality result, but also because we demonstrate a genuine commitment to contributing to the prosperity of Aotearoa New Zealand and the wellbeing of its people.

We have articulated this commitment to public value in our Building Positive Change strategy, which sets specific goals around environmental, economic and social sustainability.

Please visit our website cassidy.co.nz to find out more about our current initiatives and our progress towards achieving these goals.

SOCIAL & CULTURAL CHANGE

We will be a force for good in our society by:

- embedding diversity, equity and inclusivity within our workplaces
- prioritising the health, safety and wellness of our people
- improving supplier diversity
- engaging with and supporting our communities
- partnering with more Māori and Pasifika-owned businesses

ECONOMIC CHANGE

We will help build skills and careers in the construction sector by:

- funding apprenticeships, scholarships and cadetships
- strengthening training and development pathways for our people
- supporting our subcontractors with skills development
- creating opportunities for local businesses

ENVIRONMENTAL CHANGE

We will reduce the environmental impact of our work by:

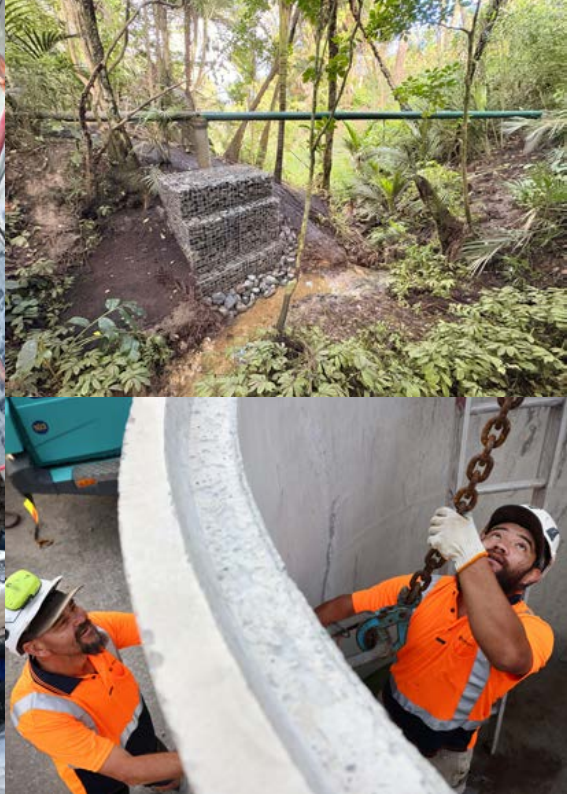

- reducing emissions
- diverting site waste from landfill
- engaging subcontractors with similar goals
